

DXG - H1 earnings in line with expectations - Earnings Flash

Company Research • 31 Jul 2025

- DXG announced its Q2 2025 results with revenue of VND1.0tn (USD40mn; -7% YoY but +13% QoQ) and NPAT-MI of VND84bn (USD3.2mn; +157% YoY and +75% QoQ). We attribute the QoQ increase in DXG's NPAT-MI in Q2 2025 mainly to (1) stronger brokerage performance and (2) ongoing handovers of unbilled backlog at Gem Sky World (GSW; Dong Nai; total project includes ~4,000 low-rise and land-plot units; ~60% presold and ~48% handed over at end-Q1 2025).
- DXG's H1 2025 NPAT-MI was VND133bn (USD5.1mn; +107% YoY) and fulfilled 49% of our full-year forecast. We foresee no significant changes to our 2025F earnings and presales forecasts, pending a fuller review.
- DXG's property development revenue declined 34% YoY in H1 2025, mainly from handovers of low-rise units at GSW (vs high-rise handovers at Opal Skyline in H1 2024). Additionally, the segment's GPM improved by 4 ppts to 44%.
- For DXG's property brokerage segment, please refer to more details in our [July 30 DXS Earnings Flash](#).
- In terms of the presales outlook, we expect 'The Privé' project (4.3 ha; HCMC; total of ~3,200 condos) to be the key presales driver for DXG in 2025F. The project has been collecting reservation bookings while the company is completing foundation construction in order to obtain the project's sales permit. In addition, we expect the ongoing development of Long Thanh International Airport to support the expected relaunch of GSW (Dong Nai; low rise) in H2 2025F.

DXG's Q2 & H1 2025 results

VND bn	Q2 2024	Q2 2025	YoY	H1 2024	H1 2025	YoY	2025F	H1 as % of 2025F
